Education

The University of Texas at El Paso — El Paso, TX
Bachelor of Science in Computer Science — *Jan. 2024 – Dec. 2026 (Expected)*

Experience

Founder & Developer — Jan. 2026 – Present
Nerrix Digital — *El Paso, TX*

- Founded a web studio for local businesses; delivered 4 client sites and run their hosting and domains
- Built the studio's site in React, Vite and Express, with an OpenAI assistant that quotes every price and term and a booking calendar with invites and no double booking
- Built KasaRentals' online equipment booking on KasaPro's API, with live availability and idempotent bookings

Software Engineering Intern — May 2025 – Sep. 2025
BW Fusion (Agronomy 365) — *Remote*

- Built an in-house end-to-end testing platform with Playwright for Agronomy 365, BW Fusion's crop analytics software for growers, replacing a paid EndTest.io subscription and saving thousands of dollars a year
- Set up 24/7 monitoring that runs the test suites against Agronomy 365's critical workflows and alerts on failure
- Built an AI invoice-processing system with LLM APIs that reads and extracts data from 100+ invoices a day
- Shipped full-stack features in React, Express.js, TypeScript and PostgreSQL, including role-based authentication and automated email notifications

Foreman — Jan. 2023 – Present
Kasa Roofing & Construction — *El Paso, TX*

- Run daily operations for a crew of 5 across about 100 projects a year: scheduling, materials and subcontractors
- Own customer communication and execution from first estimate to final walkthrough on $5K–$20K jobs

Projects

KasaPro – Contractor Management Platform | *Node.js, Express.js, MySQL, Stripe Connect, Square* — May 2026

- Built and deployed a full-stack platform for customers, estimates, jobs, invoices, rentals and team operations
- Used in production by three businesses, processing about $100K in invoices and rentals via Stripe and Square
- Implemented PDF generation, remote e-signatures and multi-business account architecture, with a test that fails the build if any SQL query on a tenant table skips the business filter
- Wrote 940 automated tests covering payments, webhooks, signing links and tenant isolation

Luv – Voice Assistant for macOS | *Swift, SwiftUI, Speech, EventKit, OpenAI Realtime API, SQLite* — Nov. 2026

- Building a menu-bar voice assistant with an on-device "Hey Luv" wake word, live transcription and spoken replies
- Gave it tools for web search, calendar, reminders, files, Mail, the screen and KasaPro, in English and Spanish
- Routed every text and email it sends through one module that runs only after the user approves it

TestHarvest | *TypeScript, React, Express.js, PostgreSQL, Playwright, Docker* — Oct. 2026

- Built a self-hosted EndTest.io alternative with no-code browser tests, scheduled runs and failure alerts
- Designed a PostgreSQL job queue with worker leases, crash recovery and exactly-once scheduling
- Secured workspaces with role-based access, AES-256-GCM encrypted secrets and host allowlists

Loan Approval ML | *Python, scikit-learn, FastAPI, Streamlit, Docker, GitHub Actions* — Oct. 2026

- Built an explainable mortgage-decision model on 483,685 Texas HMDA applications, reaching 0.857 ROC-AUC
- Designed a leakage-safe pipeline with checksum-verified data, fixed data splits and isotonic calibration
- Audited denial rates by race, sex and age, and shipped a FastAPI service, Streamlit dashboard and 95 tests

Technical Skills

Languages: Python, Java, C/C++, TypeScript, JavaScript, Kotlin, Swift, PHP, SQL, HTML/CSS
Frameworks: React, Node.js, Express, FastAPI, Streamlit, Tailwind, SwiftUI, Jetpack Compose, scikit-learn, pandas
Developer Tools: Git, GitHub, GitHub Actions, Docker, Playwright, Render, Aiven, Turso, VS Code
APIs: Stripe Connect, Square, OpenAI API
Spoken Languages: English, Spanish (fully bilingual)
