Education

The University of Texas at El Paso — El Paso, TX
Bachelor of Science in Computer Science — *Jan. 2024 – Dec. 2026 (Expected)*

Experience

Founder & Developer — Jan. 2026 – Present
Nerrix Digital (nerrixdigital.com) — *El Paso, TX*

- Founded a web development agency serving local businesses and delivered 4 client sites across contracting, rental and service industries
- Design, build and deploy responsive React, Node.js and Express applications on Render, and run hosting, domains and maintenance for every client
- Built AI customer assistants that answer business-specific questions and capture leads

Software Engineering Intern — May 2025 – Sep. 2025
BW Fusion (Agronomy 365) — *Remote*

- Built an in-house end-to-end testing platform with Playwright for Agronomy 365, BW Fusion's crop analytics software for growers, replacing a paid EndTest.io subscription and saving thousands of dollars a year
- Set up 24/7 monitoring that runs the test suites against Agronomy 365's critical workflows and alerts on failure
- Built an AI invoice-processing system for Agronomy 365 that reads and extracts data from 100+ invoices a day
- Shipped full-stack features in React, Express.js, TypeScript and PostgreSQL, including role-based authentication and automated email notifications

Foreman — Jan. 2023 – Present
Kasa Roofing & Construction — *El Paso, TX*

- Manage daily operations for a crew of 5 across roughly 100 projects per year, covering scheduling, material coordination and subcontractors
- Own customer communication and project execution from first estimate through final walkthrough on jobs valued at $5,000 to $20,000

Projects

KasaPro – Contractor Management Platform | *Node.js, Express.js, MySQL, EJS, Render, Aiven* — May 2026

- Built and deployed a full-stack business-management platform for customers, estimates, jobs, invoices, rentals and team operations
- Used in production by three businesses, with about $100,000 in invoices and rentals processed through Stripe Connect and Square
- Implemented PDF generation, remote e-signatures and multi-business account architecture, with a test that fails the build if any SQL query on a tenant table skips the business filter
- Wrote 940 automated tests covering payments, webhooks, signing links and tenant isolation

TestHarvest | *TypeScript, React, Express.js, PostgreSQL, Playwright, Docker* — Oct. 2026

- Built a self-hosted EndTest.io alternative with no-code browser tests, scheduled runs and failure alerts
- Designed a PostgreSQL job queue with worker leases, crash recovery and exactly-once scheduling
- Secured workspaces with role-based access, AES-256-GCM encrypted secrets and host allowlists

Loan Approval ML | *Python, scikit-learn, FastAPI, Streamlit, Docker, GitHub Actions* — Oct. 2026

- Built an explainable mortgage-decision model on 483,685 Texas HMDA applications, reaching 0.857 ROC-AUC
- Designed a leakage-safe pipeline with checksum-verified data, fixed data splits and isotonic calibration
- Audited denial rates by race, sex and age, keeping protected attributes out of training
- Shipped a FastAPI service and 10-page Streamlit dashboard with a versioned model registry and 95 tests

Technical Skills

Languages: Python, Java, C/C++, TypeScript, JavaScript, PHP, SQL (PostgreSQL, MySQL), HTML/CSS
Frameworks: React, Node.js, Express.js, FastAPI, Streamlit, Tailwind CSS, EJS
Developer Tools: Git, GitHub, GitHub Actions, Docker, Playwright, Render, Aiven, VS Code
Libraries: scikit-learn, pandas, NumPy, Pydantic
Spoken Languages: English, Spanish (fully bilingual)
